## Work experiences

---

### **February 2024 – August 2024 : WShop**

Position: Developer

Back support for the multiple ecommerce sites of WShop.

Technical stack: PHP, MySQL

### **December 2020 – October 2023: Optimind Mauritius Ltd**

Position: Analyst / Developer

Creation and maintenance of tools for insurance management for the company itself. I also developed reporting modules as per client request. Normally we work in groups on each project but there were projects where I was working alone depending on the availability of resources.

Technical stack: Symfony 5, Docker

### **October 2019 – November 2020: Digital Extension Ltd (Company closed)**

Position: Senior web developer

Creation and maintenance of a web based training tool for NHS (in England) used by professionals to train people. This was my first project in Symfony (redesign of an existing project which was in Codeigniter) in collaboration with 2 colleagues.

Technical stack: Symfony 5, Angular 9 / 10

### **May 2019 – September 2019: Solar Transit (SFER)**

Position : Project Manager

Creation and maintenance of sites for the company and also maintaining domain names. Please note that I was alone in the company as IT developer.

Technical stack: WordPress

**August 2018 – April 2019: Mauritius Telecom**

Position: Web and mobile application developer

Maintenance of internal tools used by the company. I was also a team leader on a project related to the maintenance of equipment in a 4 Tier Data centre. Helping other colleagues in other projects.

Technical stack: Laravel, WordPress

**November 2016 – August 2018: Blackfire Ltd**

Position: Web developer

Maintenance of ecommerce sites for our different clients. I have also helped in recreating multiple website and also added different functionalities and modules as per client request.

Technical stack: PrestaShop, Smarty

**October 2015 – November 2016: GlobalEdgeSoftware Ltd**

Position: Web developer

Creation and maintenance of multiple websites. I have also trained other people through the HRDC program.

Technical stack: PHP & MySQL, Bootstrap, Xtemplate

**December 2014 – June 2015: Mauritius Yellow Pages Online Marketing**

Position: Junior web developer

Creation and maintenance of multiple websites using Joomla.

Technical stack: Joomla

## Hobbies

---

English pool
